¹ Starting 2014, data were based on the off-line Statistical Performance Reporting System (SPRS). Beginning 2016, data on job openings reported reflect the monthly average instead of cumulative data. Likewise, the Philippine data was estimated as the total of the regional monthly averages.

² Cases of strikes may be disposed by other means outside the scope of the National Conciliation and Mediation Board.

³ Source of data for both nominal and real wage rates is the National Wages and Productivity Commission. It includes basic minimum wage and cost of living allowance (COLA). Annual figures refer to December data. Figures for regions outside NCR represent the highest nominal regional rates in a given category and their corresponding values in real terms. Starting as of 4 September 2025 data, the disaggregation between plantation and non-plantation is not anymore reflected in the NWPC's statistical publication on the summary of current regional daily minimum wage rates.

⁴ Starting 10 November 1990, adjustments in the minimum legislated wage rates were being determined by the Regional Tripartite Wages Productivity Board. Real terms were computed using 2018 as base year.

^a data covers January to March

^c data covers July to September

^P preliminary

^b data covers April to June

^d data covers October to December
